## SILOTOP® R03 Silo Venting Filters

4

### Description ▼

SILOTOP® is a cylindrically shaped dust collector for venting pneumatically filled silos. The stainless steel body contains vertically mounted, POLYPLEAT® filter elements. The air jet cleaning system is integrated in the hinged weather protection cover.

### Function ▼

Dust separated from the air flow by special POLYPLEAT® filter elements drops back into the silo after an integrated automatic reverse air jet cleaning system inside the weather protection cover has removed it from the filter elements.

### Application ▼

With tens of thousands of units working worldwide, since first going into production back in 1998, SILOTOP® has become the world's favourite solution for silo venting. The latest model conserves the benefits of the previous version adding a few more such as the particularly flowdynamic polymer top cover.

### Benefits ▼

- ✓ Robust, particularly maintenance-friendly design;
- ✓ Low dust emission;
- ✓ Compliant with latest EU health and safety standards;
- ✓ Complete replacement of filter media by only one person within a few minutes.
